

A revolution in water purification

SCALEBLASTER™

The water softener alternative

Scale Blaster™ - the electronic descaler

Revolutionary Breakthrough in Technology!

ScaleBlaster's™ signal cable produces an oscillating and complex modulating frequency wave form that produces an inaudible sonic impulse that changes the electrical and physical properties of the scale-forming calcium molecules. This causes the adhesive properties of the calcium carbonate crystals and other minerals to repel rather than adhere to pipes, fixtures and remain suspended in the water. This action stops any further build-up of scale and because the solubility of the water is increased, existing scale is taken back into the water and gradually removed.

Absolutely No Maintenance Required

Up until now, the only other solution to your hard water problems was a water softener...
